PRESS RELEASE

2007 August 01

PropertyMaps.com Expands Service to Massachusetts

PropertyMaps.com has launched its new map-based real estate search in the State of Massachusetts while promising free MLS access.

PropertyMaps.com announces that it has extended its coverage to include the Greater Boston Real Estate Board and the New England Regional MLS Property Information Network. With the inclusion of this data, PropertyMaps will extend coverage to over 56,000 active listings of area REALTORS®.

“We are excited to offer this new map-based MLS search in conjunction with our local brokerage partner, Robb Enterprises. President Stephen Robb represents a new breed of real estate broker that is technologically progressive, and interested in providing his clients with the best research tools available. PropertyMaps is proud to partner with our independent brokers from across the country to add a national map-based MLS search to the public’s research options. Not only does this help locally owned brokerages compete on the Internet against the national juggernauts, but the public benefits from better information resources competing for their attention” says John Beck, President of PropertyMaps.com.

About PropertyMaps

PropertyMaps.com enables people to quickly search and easily perceive millions of real estate listings by plotting their locations and local market data using popular mapping tools such as Google Maps, Google Earth, and Microsoft Virtual Earth. PropertyMaps.com is the first Internet search engine to provide map-based access to over 60 million properties contained in the Multiple Listing Service (MLS) databases that are used by Realtors® nationwide. PropertyMaps uniquely delivers this content wirelessly to Internet-enabled phones, PDAs, GPS-enabled and other mobile devices. “We believe that pinpointing the exact location of for-sale listings before investing the time into long driving tours is the future of home buying and selling on the Internet,” states the company President, John M. Beck. All of PropertyMaps software services are made available to the public free of charge.

Sarasota based PropertyMaps, Inc has partnered with Silicon Valley’s Rockbridge Group for capital consulting and brokering services.
