

FOR IMMEDIATE RELEASE

PropertyMaps.com Announces Affiliation with Jeff Fogler of Signature Brokers

Denver, CO/ May 8, 2008 – PropertyMaps (www.propertymaps.com) today announced an affiliate partnership with Jeff Fogler of Signature Brokers to represent the Denver market for PropertyMaps.com, the national map-based online real estate search.

“We have now entered Colorado’s Capital of Denver and surrounding locations adding around 26,000 new property listings. According to the Rocky Mountain News, while the national population is growing at just under 1 percent a year, Colorado’s rate is 1.4 percent and is forecasted to be 1.8 percent in the near future. Apparently that’s a rate more typical of developing countries than of most Western democracies.” said Matt Beck, company founder and President. “We’re thrilled to extend our visual map-based real estate search tools to this important market,” says Beck.

PropertyMaps.com is a user-friendly, one-stop-shop Web site that allows consumers to quickly search the actual Multiple Listing Service (MLS) databases used by Realtors® nationwide by using popular mapping tools such as Google Maps, Google Earth, and Microsoft Virtual Earth. PropertyMaps currently has 1.3 million listings and expects to reach 2.2 million by the end of June.

“After coming across the PropertyMaps.com site, I was impressed by the mapping functions. The site provides an easy to use graphical mapping process for property searches and this type of searching system is just a better way to find properties,” said Jeff Fogler of Signature Brokers.

Signature Brokers has been open for just over a year in the Denver area, however, Jeff Fogler, Broker and Managing Partner, brings 31 years of Denver real estate experience. Their specialty is with residential real estate and they also represent several major national financial institutions for the listing and sale of REOs.

About PropertyMaps.com: Using popular mapping tools such as Google Maps, Google Earth, and Microsoft Virtual Earth, PropertyMaps.com enables people to quickly search and easily visualize millions of real estate listings by plotting their locations and local market data free of charge. PropertyMaps.com is the first Internet site to provide map-based access to the authentic Multiple Listing Service (MLS) databases that are used by Realtors® nationwide. PropertyMaps also delivers the content wirelessly to Internet-enabled phones, PDAs, GPS-enabled and other mobile devices.
